

Dear FCC, Why on earth would you allow someone to influence freedom of information and speech over XM satellite radio's weather and traffic reports. I sometimes travel in areas where there are limited weather reports if any due to the lack of radio reception. I see this as a danger to people that might be caught in unexpected conditions such as flood's, tornado's, and blizzards. That's one reason I signed on with XM Radio. It would be an injustice to take this service away from XM subscribers. I do not think it should be up to the National Association of Broadcasters to tell me or anyone else what should be heard. I respectfully urge you to reject the NAB's petition 04-160.

Sincerely,  
Rodney Furgason
